PRESS RELEASE

Avnet, Inc. Reports Fourth Quarter and Fiscal Year 2014 Results

Return to revenue growth key to strong EPS leverage

Phoenix, August 6, 2014—Avnet, Inc. (NYSE:AVT) today announced results for the fourth quarter and the full fiscal year 2014 ended June 28, 2014.

Fiscal 2014 Results

	FISCAL YEARS ENDED

Adjusted Diluted EPS (1)	\$	4.24	\$	3.63	16.8%

- (1) A reconciliation of non-GAAP financial measures to GAAP financial measures is presented in the Non-GAAP Financial Information section of this press release.
- Sales for the fiscal year increased 8.0% from the prior year to \$27.5 billion; organic sales (as defined later in the document) were up 5.2% year over year and 4.8% in constant currency
- Adjusted operating income of \$931 million and 3.4% of sales, increased 15.3% year over year
- Adjusted diluted earnings per share of \$4.24 increased 16.8% year over year; GAAP diluted earnings per share of \$3.89 was up 21.2% year over year
- Cash flow from operations was \$237 million and the Company returned \$91 million of cash to shareholders through dividends and share repurchases

Rick Hamada, Chief Executive Officer, commented, "In fiscal 2014, our return to year-over-year growth helped drive meaningful improvements in our financial and operational performance. We added over \$2 billion to our top line, expanded margins and returns, and grew adjusted diluted earnings per share at twice the rate of revenue. Led by double digit growth in our Electronics Marketing (EM) businesses in Asia and EMEA, enterprise revenue increased 8% and organic revenue was up 5%. The combination of revenue growth, relatively stable gross profit margin and continued expense discipline resulted in adjusted earnings per share growing 16.8% over fiscal 2013 to \$4.24. During the year, we also invested in growth initiatives by strengthening our embedded systems capabilities at EM with the acquisition of MSC Technologies and expanding our datacenter solution capabilities by incorporating new technologies, services and partners to our TS offerings. We also modified our capital allocation priorities to incorporate a more consistent element of return to shareholders with the initiation of a dividend. As we enter fiscal 2015, we are poised to build on this performance and drive further improvements in both margins and returns as we continue to execute on our profitable growth initiatives across our portfolio."

Adjusted Diluted EPS (1)	\$	1.14	\$	1.02	11.8%

- (1) A reconciliation of non-GAAP financial measures to GAAP financial measures is presented in the Non-GAAP Financial Information section of this press release.
- Sales for the fourth quarter increased 6.9% year over year to \$7.0 billion; organic sales grew 5.0% year over year and 3.9% in constant currency
- Adjusted operating income of \$244.9 million increased 5.9% year over year primarily due to an improvement in profitability at EM
- Adjusted net income of \$160.1 million increased 12.9% and adjusted diluted earnings per share of \$1.14 increased 11.8% year over year

Mr. Hamada added, "We closed out fiscal 2014 with a strong quarter as both revenue and earnings per share were at the high end of expectations and margins and returns improved sequentially. Enterprise revenue grew 6.9% year over year and 5.2% sequentially in constant currency, which is at the high end of normal seasonality, driven by stronger than expected revenue in our TS Americas and EM Asia regions. Adjusted operating income grew 9.4% sequentially and adjusted operating income margin was up 12 basis points with both operating groups contributing to the improvement. Working capital velocity improved sequentially and our cash cycle dropped over two days, which contributed to a 218 basis point increase in our return on working capital to 22%. While our fourth quarter results showed some encouraging signs in certain end markets, looking ahead to fiscal 2015, I would continue to characterize our overall outlook as mixed in nature. Given these expectations, we will keep driving increased leverage and margins where growth is strongest, while always refocusing our valuable resources on higher-growth and return opportunities."

Operating Income	\$ 207.0	\$ 178.5	16.0%
Operating Income Margin	4.8%	4.5%	30 bps

(1) Year-over-year sales growth rate excluding the impact of changes in foreign currency exchange rates.

- Reported sales increased 8.8% year over year to \$4.3 billion while organic sales were up 6.7% in constant currency
- Sequential organic sales growth of 4.4% in constant currency was above the high end of normal seasonality primarily due to better than expected growth in the Asia region
- Operating income margin increased 30 basis points year over year to 4.8% primarily due to improvements in the Americas and EMEA regions
- Working capital velocity improved sequentially and EM's cash cycle dropped 2.8 days driven by a decline in days of inventory and an increase in days
 payable
- Return on working capital (ROWC) increased 108 basis points year over year primarily due to higher operating income

Mr. Hamada further added, "EM closed out the fiscal year with another strong performance as our team delivered a fourth consecutive quarter of year-overyear organic growth and operating margin expansion. For the full year, our Asia team delivered double digit year-over-year organic growth in all four quarters, grew operating income 1.4 times the rate of sales growth and doubled economic profit over fiscal 2013. In our Americas region, which dealt with sluggish growth all year, improved gross profit margin and disciplined expense control combined to drive full year operating income margin up 90 basis points year over year. In our EMEA region, our integration of the MSC Group has proceeded as planned and we are confident that our newly combined strengths in embedded solutions will position us to accelerate growth in this new and incremental market segment. With our book to bill continuing above parity and seasonal growth projected for the September quarter, we expect to continue the steady progress we have made towards EM's long-range financial goals."

Operating Income Margin	2.7%	3.0%	(30) bps

(1) Year-over-year sales growth rate excluding the impact of changes in foreign currency exchange rates.

- Reported sales increased 4.2% year over year to \$2.7 billion and organic sales increased 0.3% in reported dollars and was flat in constant currency
- Sequential sales growth of 7.0% (6.6% on an organic basis in constant currency) was at the high end of normal seasonality
- Operating income margin decreased 30 basis points year over year and was up 32 basis points sequentially to 2.7% due primarily to improvements in the Americas and Asia partially offset by a decline in EMEA
- ROWC increased 461 basis points sequentially due to strong profit growth
- At a product level, year-over-year growth in software, services and storage was offset by declines in computing components

Mr. Hamada further commented, "In the June quarter, we experienced a somewhat encouraging rebound in our TS Americas region after a weaker than expected close to the March quarter as revenue grew close to 14% sequentially and operating income margin increased over 100 basis points. In TS Asia, which delivered a sixth consecutive quarter of year-over-year margin expansion, revenue grew 4.6% sequentially and operating income margin income margin income margin was up over 80 basis points. The stronger than expected growth in the Americas region was offset by a sequential decline in EMEA, resulting in sequential revenue growth of 6.6% in constant currency at the global level. On a year-over-year basis, organic growth in constant currency was essentially flat as a 4.8% increase in the Americas region was offset by an 11.9% decline in EMEA, with more than half of the EMEA revenue decline attributable to our computing components business. As a result, operating income declined 5.9% from the year ago quarter and operating income margin was down 30 basis points. Although we are encouraged by Americas' return to revenue growth and Asia's steady margin progress, we are taking incremental actions to align resources to current market conditions in EMEA. This will include the acceleration of planned efficiencies associated with our recent consolidation onto a single ERP platform at EMEA, to improve margins going forward."

Cash Flow / Dividend

- Cash flow from operations was \$34 million for the quarter and \$237 million on a trailing 12 months basis
- Cash and cash equivalents at the end of the quarter was \$929 million; net debt (total debt less cash and cash equivalents) was approximately \$1.1 billion
- Repurchased \$7.4 million of shares during the quarter and have approximately \$216 million remaining in the share repurchase program
- Paid a quarterly dividend of \$20.7 million (\$0.15 per share) and \$82.8 million (\$0.60 per share) for the full fiscal year

Kevin Moriarty, Chief Financial Officer, stated, "Cash flow from operations declined in fiscal 2014 as we invested in working capital to support the over \$2 billion of top line growth. The team has continued to effectively manage working capital in this uneven recovery as key metrics, including inventory turns and days sales outstanding, remain consistent with fiscal 2013. During the year, we also returned over \$90 million of cash to our shareholders through our dividends and share repurchases. Just recently, we entered into a new credit facility that increased our borrowing capacity and extended the maturity. As a result of these actions, we enter fiscal 2015 in a strong financial position with over \$900 million of cash on hand and over \$1.4 billion of available borrowing capacity to fund profitable growth going forward."

Outlook for First Quarter of Fiscal 2015 Ending on September 27, 2014

- EM sales are expected to be in the range of \$4.1 billion to \$4.4 billion and TS sales are expected to be between \$2.3 billion to \$2.6 billion
- Avnet sales are forecasted to be between \$6.4 billion and \$7.0 billion
- Adjusted diluted earnings per share is expected to be in the range of \$0.93 to \$1.03 per share
- The EPS guidance assumes 141 million average diluted shares outstanding and a tax rate of 26% to 30%

The above EPS guidance excludes the amortization of intangibles and any potential restructuring and integration charges. In addition, the above guidance assumes that the average U.S. Dollar to Euro currency exchange rate for the first quarter of fiscal 2015 is \$1.35 to \pounds 1.00. This compares with an average exchange rate of \$1.32 to \pounds 1.00 in the first quarter of fiscal 2014 and \$1.37 to \pounds 1.00 in the fourth quarter of fiscal 2014.

Forward-Looking Statements

This document contains certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are based on management's current expectations and are subject to uncertainty and changes in facts and circumstances. The forward-looking statements herein include statements addressing future financial and operating results of Avnet and may include words such as "will," "anticipate," "estimate," "forecast," "expect," "feel," "believe," and "should," and other words and terms of similar meaning in connection with any discussions of future operating or financial performance, business prospects or market conditions. Actual results may vary materially from the expectations contained in the forward-looking statements.

The following factors, among others, could cause actual results to differ materially from those described in the forward-looking statements: the Company's ability to retain and grow market share and to generate additional cash flow, risks associated with any acquisition activities and the successful integration of acquired companies, declines in sales, changes in business conditions and the economy in general, changes in market demand and pricing pressures, any material changes in the allocation of product or product rebates by suppliers, and other competitive and/or regulatory factors affecting the businesses of Avnet generally.

More detailed information about these and other factors is set forth in Avnet's filings with the Securities and Exchange Commission, including the Company's reports on Form 10-K, Form 10-Q and Form 8-K. Except as required by law, Avnet is under no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

Non-GAAP Financial Information

In addition to disclosing financial results that are determined in accordance with generally accepted accounting principles in the United States ("GAAP"), the Company also discloses in this document certain non-GAAP financial information including adjusted operating income, adjusted net income and adjusted diluted earnings per share, as well as sales adjusted for the impact of acquisitions and other items (as defined in the Organic Sales section of this document). Management believes organic sales is a useful measure for evaluating current period performance as compared with prior periods and for understanding underlying trends.

Management believes that operating income adjusted for (i) restructuring, integration and other expenses, and (ii) amortization of acquired intangible assets and other, is a useful measure to help investors better assess and understand the Company's operating performance, especially when comparing results with previous periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of Avnet's normal operating results or non-cash in nature. Management analyzes operating income without the impact of these items as an indicator of ongoing margin performance and underlying trends in the business. Management also uses these non-GAAP measures to establish operational goals and, in some cases, for measuring performance for compensation purposes.

Management believes net income and diluted earnings per share adjusted for (i) the impact of the items described above, (ii) certain discrete items impacting income tax expense and (iii) the gain on legal settlement, bargain purchase and other is useful to investors because it provides a measure of the Company's net profitability on a more comparable basis to historical periods and provides a more meaningful basis for forecasting future performance. Additionally, because of management's focus on generating shareholder value, of which net profitability is a primary driver, management believes net income and diluted earnings per share excluding the impact of these items provides an important measure of the Company's net results of operations for the investing public.

Other metrics management monitors in its assessment of business performance include return on working capital (ROWC), return on capital employed (ROCE) and working capital velocity (WC velocity).

- ROWC is defined as annualized adjusted operating income (as defined above) divided by the sum of the monthly average balances of receivables and inventories less accounts payable.
- ROCE is defined as annualized, tax effected adjusted operating income (as defined above) divided by the monthly average balances of interestbearing debt and equity (including the impact of adjustments to operating income discussed above) less cash and cash equivalents.
- WC velocity is defined as annualized sales divided by the sum of the monthly average balances of receivable and inventories less accounts payable.

Any analysis of results and outlook on a non-GAAP basis should be used as a complement to, and in conjunction with, results presented in accordance with GAAP.

- Restructuring, integration and other expenses of \$59.8 million before tax consisted of \$25.5 million for severance, \$19.6 million for facility exit and asset impairment costs, \$4.8 million for other restructuring related costs, \$8.2 million for integration-related costs, \$1.8 million for other costs, and a net benefit of \$0.1 million to adjust prior restructuring liabilities. Restructuring, integration and other expenses after tax was \$43.6 million;
- An adjustment to the gain on bargain purchase related to the business acquired in Japan in the first quarter;
- Amortization expense and other substantially all of which related to acquired intangible assets of \$8.5 million before tax and \$6.0 million after tax; and
- An income tax benefit of \$34.2 million, which is comprised of (i) a tax benefit of \$27.6 million for the release of tax valuation allowances against deferred tax assets that were determined to be realizable during the fourth quarter of fiscal 2013, and (ii) a tax benefit of \$6.6 million related to the release of existing reserves due to audit settlement and statute expiration.

Organic Sales

Organic sales is defined as reported sales adjusted for (i) the impact of acquisitions and divestitures by adjusting Avnet's prior periods to include the sales of acquired businesses and exclude the sales of divested businesses as if the acquisitions and divestitures had occurred at the beginning of the earliest period presented and (ii) the impact of the transfer of a portion of certain operations between the EM and TS operating groups, which did not have an impact to Avnet on a consolidated basis but did impact the organic sales for the EM and TS operating groups. Sales taking into account the combination of these adjustments are referred to as "organic sales."

Key Highlights

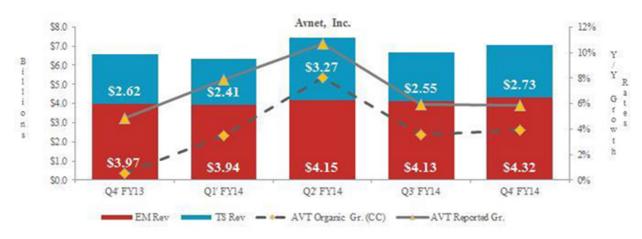

- Sales for the fourth quarter of fiscal 2014 were at the high end of expectations and increased 6.9% year over year to \$7.0 billion; organic sales (defined later in this document) grew 5.0% year over year and 3.9% excluding the translation impact of changes in foreign currency exchange rates (also referred to as "constant dollars" or "constant currency" and referenced to as "CC" in the graphs that follow).
 - Sequentially, sales were at the high end of normal seasonality as reported sales increased 5.5% and organic sales increased 5.2% in constant dollars, primarily due to strength in the TS Americas and EM Asia regions.
- Gross profit margins increased 17 basis points from the year ago quarter primarily due to an improvement in the higher margin western regions at EM, which was partially offset by decline at TS.
 - Sequentially, gross profit margin declined 17 basis points primarily due to the geographic mix shift to the lower margin Asia region and a decline in TS EMEA related to the decline in sales.
- Adjusted operating income increased 5.9% year over year primarily due to the increase in sales and operating income margin was essentially flat with the year ago quarter.
 - Sequentially, adjusted operating income grew 9.4% and operating income margin increased 12 basis points with both operating groups contributing to the improvement.
- Adjusted diluted earnings per share of \$1.14 increased 11.8% year over year, primarily due to the improvement in profitability at EM, partially offset by a decline at TS.
- Avnet ROWC decreased 181 basis points and ROCE declined 77 basis points year over year, primarily due to a decline at TS, which was partially offset by an improvement at EM.
- Cash flow from operations was \$34 million in the quarter as working capital increased approximately 3.4% sequentially to support higher levels of sales. Cash flow from operations for the trailing twelve months was \$237 million.
- During the quarter, the Company paid a quarterly cash dividend of \$20.7 million (\$0.15 per share), and has paid \$82.8 million (\$0.60 per share) during the fiscal year.

(1) Year-over-year sales growth rate excluding the impact of changes in foreign currency exchange rates.

(2) Organic sales as defined in this document.

- Avnet quarterly reported sales of \$7.0 billion increased 6.9% year over year (5.9% in constant currency) with both operating groups contributing towards this growth.
 - Year-over-year organic sales increased 5.0% (3.9% in constant currency), with all four quarters of fiscal 2014 delivering year-over-year growth.
 - On a sequential basis, organic sales increased 5.2% in constant currency, as both operating groups delivered results at the high end of expectations and normal seasonality. The normal seasonal range for the June quarter is +1% to +5%.

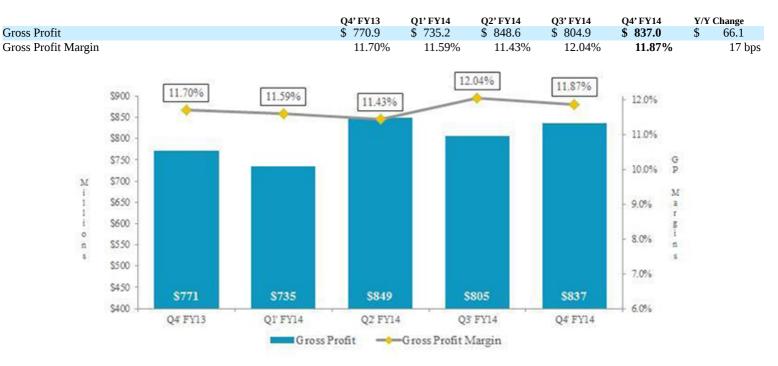

- EM's quarterly sales of \$4.3 billion exceeded the high end of expectations driven by better than anticipated sales in the Asia region. Reported sales increased 8.8% year over year (7.3% in constant currency) and organic sales grew 8.1% (6.7% in constant currency) due to strength in the Asia and EMEA regions.
- EM's organic sales grew 4.4% sequentially in constant currency, above the normal seasonal range of 0% to +4%.
 - Americas' organic sales decreased 3.5% year over year and increased 4.5% sequentially.
 - EMEA's organic sales increased 6.6% year over year and 0.4% sequentially in constant currency.
 - Asia's organic sales increased 15.2% year over year and 8.0% sequentially.

- TS' quarterly sales increased 4.2% year over year (3.8% in constant currency) to \$2.7 billion, primarily due to the strength in the Americas region; organic sales increased 0.3% and was essentially flat in constant currency.
- TS' organic sales increased 6.6% sequentially in constant currency, near the high end of normal seasonality of +3% to +7%. This increase is primarily due to the better than expected sales at TS Americas which was partially offset by lower than expected sales at TS EMEA.
 - Americas' organic sales increased 4.8% year over year and 13.8% sequentially.
 - EMEA's organic sales decreased 11.9% year over year in constant currency with more than half of the decline attributable to the computing components business and declined 4.2% sequentially.
 - Asia's organic sales decreased 2.3% year over year and improved 4.6% sequentially.
- At a product level, year-over-year growth in software, services and storage was offset by declines in computing components.

Gross Profit

- Gross profit was \$837.0 million, up 8.6% year over year and 4.0% sequentially.
 - Gross profit margin of 11.9% increased 17 basis points from the year ago quarter, primarily due to an improvement at EM, which was partially offset by the decline at TS. Gross profit margin decreased 17 basis points sequentially, primarily due to declines at both operating groups.
- EM gross profit margin increased 31 basis points from the year ago quarter primarily driven by strength in the western regions and the acquisition of MSC. Gross profit margin decreased 15 basis points sequentially with essentially all of the decline due to the geographic mix shift to Asia.
- TS gross profit margin declined 12 basis points year over year as an increase in Asia was offset by the decline in the Americas region. TS gross profit margin declined 13 basis points sequentially.

Operating Expenses

- Adjusted selling, general and administrative expenses ("SG&A expenses") increased approximately 9.7% year over year to \$592.2 million.
 - The year-over-year increase consisted primarily of a net increase of approximately \$33 million related to operating expenses from acquired businesses and approximately \$9 million related to the translation impact of changes in foreign currency exchange rates between the periods. In addition, included in SG&A are additional expenses to fund organic growth and other costs including employee merit compensation increases that took effect in January of 2014 offset by the realization of cost savings from fiscal 2013 and fiscal 2014.
- Adjusted SG&A expenses, as a percentage of gross profit increased 74 basis points to 70.7% from the year ago quarter.
 - EM SG&A expenses as a percent of gross profit decreased 144 basis points from the year ago quarter and 127 basis points sequentially. The decline is primarily due to improved operating leverage from increased gross profit and the impact of restructuring actions taken.
 - TS SG&A expenses as a percent of gross profit increased 263 basis points from the year ago quarter primarily due to the decline in sales and gross profit at TS EMEA. Sequentially, SG&A expenses as a percentage of gross profit decreased 373 basis points primarily due to improvements in the Asia and Americas regions partially offset by an increase in the EMEA region.

- Avnet adjusted operating income of \$244.9 million increased 5.9% year over year primarily due to an increase at EM. Sequentially, adjusted operating income increased 9.4% with both operating groups contributing towards this improvement.
 - Adjusted operating income margin of 3.5% at the Avnet level decreased 4 basis points year over year and increased 12 basis points sequentially.
- EM operating income margin increased 30 basis points from the year ago quarter to 4.8% primarily due to improved profitability in the Americas and EMEA regions. Operating income margin improved 11 basis points sequentially primarily due to sales growth across all three regions.
- TS operating income margin declined 30 basis points from the year ago quarter primarily due to declines in the EMEA and Americas regions, partially offset by improved profitability in the Asia region related to revenue selection and expense efficiencies. Operating income margin increased 32 basis points sequentially primarily due to the sales growth in the Americas region and sales growth and expense efficiencies in Asia, which were partially offset by lower profitability due to a decline in sales in the EMEA region.

Adjusted Effective Tax Rate (1)	27.6	6%	27.3%		28.8%		28.3%		27.0%		(59) bps

- Interest expense was \$24.3 million; down \$4.3 million from the year ago period. The decrease in interest expense was primarily due to the repayment at maturity of the 5.875% Notes due March 15, 2014, and a corresponding lower average borrowing rate.
- The Company reported \$4.6 million of other expense during the fourth quarter compared to an expense of \$6.7 million in the year ago quarter. This decrease was primarily related to a decrease in foreign currency exchange losses from the prior year and the net impact of other items.
- The GAAP effective tax rate was (6.1)% in the fourth quarter of fiscal 2014 as compared with 0.8% in the fourth quarter of fiscal 2013. The yearover-year decrease in effective tax rate was primarily due to a larger amount of tax benefits from net valuation allowance releases and favorable audit settlements in the fourth quarter of fiscal 2014.

<u>Net Income and EPS</u>

Adjusted Diluted EPS (1)	\$ 1.02	\$ 0.90	\$ 1.17	\$ 1.03	\$ 1.14	11.8%

- GAAP net income increased by \$60.2 million year over year to \$186.3 million or \$1.33 per share on a diluted basis, which increased 64.2% sequentially primarily due to the improvement in profitability discussed above and the reduction in the GAAP effective tax rate.
- Adjusted net income for the fourth quarter of fiscal 2014 was \$160.1 million or \$1.14 per share on a diluted basis.
 - On an adjusted basis, net income and diluted earnings per share increased from the year ago quarter by 12.9% and 11.8%, respectively, primarily due to higher operating income at EM.
 - Adjusted diluted earnings per share of \$1.14 increased \$0.11 or 10.7% sequentially primarily due to the improvement in profitability at both operating groups.

- (1) A reconciliation of non-GAAP financial measures is presented in the Non-GAAP Financial Information section of the press release attached as Exhibit 99.1 included in this Current Report on Form 8-K.
 - Working capital (receivables plus inventories less accounts payable) increased \$576.4 million year over year and \$445.0 million or 11.54% when adjusted for acquisitions and the translation impact of changes in foreign currency exchange rates. The increase was primarily to support the year over year growth in sales at both operating groups.
 - On a sequential basis, working capital increased \$144.3 million and \$148.8 million or 3.47% when adjusted for the translation impact of changes in foreign currency exchange rates, primarily due to an increase in receivables.
 - Working capital velocity increased 0.41 turns sequentially primarily due to the growth in sales and declined 0.46 turns from the year ago quarter due to an increase in working capital.
 - Inventories increased \$349.0 million year over year and \$218.4 million or 9.64% when adjusted for acquisitions and the translation impact of changes in foreign currency exchange rates, primarily to support the sales growth at EM.
 - On a sequential basis, inventories increased \$103.0 million and \$112.0 million or 4.46% after adjusting for the translation impact of changes in foreign currency exchange rates.

<u>Returns</u>

	Q4' FY13	Q1' FY14	Q2' FY14	Q3' FY14	Q4' FY14	Y/Y Change
Return on Working Capital (ROWC) (1)	23.85%	19.84%	24.04%	19.86%	22.04%	(181) bps
Return on Capital Employed (ROCE) (1)	12.52%	10.40%	12.84%	10.70%	11.75%	(77) bps

- ROWC for the fourth quarter of fiscal 2014 was 22.0%, a decrease of 181 basis points year over year and an increase of 218 basis points sequentially.
 - The year-over-year decrease was primarily due to lower returns at TS as EM's ROWC increased 108 basis points with the Americas and EMEA contributing towards the increase.
 - The sequential increase was primarily due to an improvement at both operating groups.
- ROCE of 11.8% was down 77 basis points from the year ago quarter and up 105 basis points sequentially.

TTM CF from Operations	\$ 696.2	\$ 489.0	\$ 134.6	\$ 470.7	\$ 237.4	\$	(458.8)

- During the fourth quarter of fiscal 2014, cash flow from operations was \$33.5 million and was \$237.4 million for the fiscal year.
- The cash flow from operations for fiscal 2014 was primarily driven by a 21.2% increase in net income partially offset by an increase in working capital at both operating groups.
- During the quarter, the Company repurchased \$7.4 million of shares under the share repurchase program. As of the end of the quarter, the Company had approximately \$216 million remaining in the program.
- During the quarter, the Company paid a dividend of \$0.15 per share, or \$20.7 million in total, and \$0.60 per share or \$82.8 million for the fiscal year.
- Cash and cash equivalents at the end of the quarter were \$929.0 million, of which \$815.4 million was held outside the United States; net debt (total debt less cash and cash equivalents) was approximately \$1 billion.

Key Highlights

- For fiscal 2014, consolidated sales increased 8.0%, or \$2.0 billion to \$27.5 billion, driven by strength at both operating groups. EM delivered consistent growth as all four quarters grew high single digits or better, partially offset by an uneven recovery at TS as IT demand varied by region.
 - Organic sales improved 5.2% year over year (4.8% in constant currency) driven by a 9.1% increase (8.2% in constant currency) at EM and flat growth at TS.
- In fiscal 2014, Avnet returned to year-over-year growth, which drove improvement in both margins and returns.
 - Gross profit increased 8.3% to \$3.23 billion and gross profit margin was essentially flat at both operating groups. At EM, gross profit margin improvement in the western regions was offset by a geographic mix shift to the lower margin Asia region as sales grew from 38% to 40% of the total at EM.
 - Adjusted selling, general and administrative expenses ("SG&A expenses") were \$2.3 billion for fiscal 2014, an increase of \$122 million, or 5.6% over fiscal 2013. This increase consisted primarily of an increase of approximately \$138 million related to expenses from acquired business and approximately \$18 million related to the translation impact of changes in foreign currency exchange rates between the fiscal years. These increases were partially offset by a decrease of approximately \$34 million due to the realization of cost savings from fiscal 2013 and fiscal 2014 restructuring actions, net of increases in SG&A expenses to fund organic growth and other costs including employee merit compensation increases that took effect in January of 2014.
 - Adjusted operating income at the enterprise level grew approximately 15% to \$931.3 million and adjusted operating income margin improved 22 basis points
 - EM operating income margin increased 31 basis point to 4.5% primarily due to improvement in the Americas and Asia regions.
 - TS operating income margin was flat at 2.9% as an improvement in Asia was partially offset by weakness in the western regions.
 - Adjusted diluted earnings per share improved 16.8% to \$4.24 primarily due to improved operating income at both operating groups.
 - Cash flow from operations was \$237.4 million for the fiscal year, which supported the \$116.9 million invested in value creating M&A and over \$90 million used toward the dividend and share repurchase program.
- For fiscal 2014, ROWC improved 70 basis points to 21.5% and ROCE improved 41 basis points to 11.4%.

Forward-Looking Statements

This document contains certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are based on management's current expectations and are subject to uncertainty and changes in facts and circumstances. The forward-looking statements herein include statements addressing future financial and operating results of Avnet and may include words such as "will," "anticipate," "estimate," "forecast," "expect," "believe," "should," and other words and terms of similar meaning in connection with any discussions of future operating or financial performance, business prospects or market conditions. Actual results may vary materially from the expectations contained in the forward-looking statements.

The following factors, among others, could cause actual results to differ materially from those described in the forward-looking statements: the Company's ability to retain and grow market share and to generate additional cash flow, risks associated with any acquisition activities and the successful integration of acquired companies, declines in sales, changes in business conditions and the economy in general, changes in market demand and pricing pressures, any material changes in the allocation of product or product rebates by suppliers, and other competitive and/or regulatory factors affecting the businesses of Avnet generally.

More detailed information about these and other factors is set forth in Avnet's filings with the Securities and Exchange Commission, including the Company's reports on Form 10-K, Form 10-Q and Form 8-K. Except as required by law, Avnet is under no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

Organic Sales

Organic sales is defined as reported sales adjusted for (i) the impact of acquisitions and divestitures by adjusting Avnet's prior periods to include the sales of acquired businesses and exclude the sales of divested businesses as if the acquisitions and divestitures had occurred at the beginning of the earliest period presented and (ii) the impact of the transfer of a portion of certain operations between the EM and TS operating groups, which did not have an impact to Avnet on a consolidated basis but did impact the organic sales for the TS and EM operating groups. Sales taking into account the combination of these adjustments are referred to as "organic sales."

Non-GAAP Financial Information

In addition to disclosing financial results that are determined in accordance with generally accepted accounting principles in the United States ("GAAP"), the Company also discloses in this document certain non-GAAP financial information including adjusted operating income, adjusted net income and adjusted diluted earnings per share, as well as sales adjusted for the impact of acquisitions and other items (as defined in the Organic Sales section of this document). Management believes organic sales is a useful measure for evaluating current period performance as compared with prior periods and for understanding underlying trends.

Management believes that operating income adjusted for restructuring, integration and other expenses, and amortization of acquired intangible assets and other, is a useful measure to help investors better assess and understand the Company's operating performance, especially when comparing results with previous periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of Avnet's normal operating results or non-cash in nature. Management analyzes operating income without the impact of these items as an indicator of ongoing margin performance and underlying trends in the business. Management also uses these non-GAAP measures to establish operational goals and, in some cases, for measuring performance for compensation purposes.

Management believes net income and diluted earnings per share adjusted for (i) the impact of the items described above, (ii) certain discrete items impacting income tax expense and (iii) the gain on legal settlement, bargain purchase and other is useful to investors because it provides a measure of the Company's net profitability on a more comparable basis to historical periods and provides a more meaningful basis for forecasting future performance. Additionally, because of management's focus on generating shareholder value, of which net profitability is a primary driver, management believes net income and diluted earnings per share excluding the impact of these items provides an important measure of the Company's net results of operations for the investing public.

Other metrics management monitors in its assessment of business performance include return on working capital (ROWC), return on capital employed (ROCE) and working capital velocity (WC velocity).

 ROWC is defined as annualized adjusted operating income (as defined above) divided by the sum of the monthly average balances of receivables and inventories less accounts payable.

- ROCE is defined as annualized, tax effected adjusted operating income (as defined above) divided by the monthly average balances of interestbearing debt and equity (including the impact of adjustments to operating income discussed above) less cash and cash equivalents.
- WC velocity is defined as annualized sales divided by the sum of the monthly average balances of receivables and inventories less accounts payable.

Any analysis of results and outlook on a non-GAAP basis should be used as a complement to, and in conjunction with, results presented in accordance with GAAP. A reconciliation of the non-GAAP financial measures to the GAAP financial measures is included in the Company's press release dated August 6, 2014.
