

Non-GAAP Financial Information

In addition to disclosing financial results that are determined in accordance with generally accepted accounting principles in the United States ("GAAP"), the Company also discloses in this press release certain non-GAAP financial information including adjusted operating income, adjusted net income and adjusted diluted earnings per share, as well as revenue adjusted for the impact of acquisitions and other items (as defined in the Pro Forma (Organic) Revenue section of this release). Management believes pro forma revenue is a useful measure for evaluating current period performance as compared with prior periods and for understanding underlying trends.

Management believes that operating income adjusted for restructuring, integration and other items is a useful measure to help investors better assess and understand the Company's operating performance, especially when comparing results with previous periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of Avnet's normal operating results. Management analyzes operating income without the impact of these items as an indicator of ongoing margin performance and underlying trends in the business. Management also uses these non-GAAP measures to establish operational goals and, in some cases, for measuring performance for compensation purposes.

Management believes net income and EPS adjusted for the impact of the items described above is useful to investors because it provides a measure of the Company's net profitability on a more comparable basis to historical periods and provides a more meaningful basis for forecasting future performance. Additionally, because of management's focus on generating shareholder value, of which net profitability is a primary driver, management believes net income and EPS excluding the impact of these items provides an important measure of the Company's net results of operations for the investing public. However, analysis of results and outlook on a non-GAAP basis should be used as a complement to, and in conjunction with, data presented in accordance with GAAP.
