## Section 1 – Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

This Specialized Disclosure Report on Form SD and the Conflict Minerals Report, filed as Exhibit 1.01, are filed by Avnet, Inc. (collectively with its consolidated subsidiaries, the “Company”) pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended (“Conflict Minerals Rule”), for the calendar year ended December 31, 2022, and is posted on the Company’s website at <https://www.avnet.com/wps/portal/us/about-avnet/human-rights/conflict-minerals>. Information contained on, or accessible through, the Company’s website is neither part of nor incorporated by reference into this Report.

### Item 1.02 Exhibit

The Conflict Minerals Report described in Item 1.01 is filed as Exhibit 1.01 to this Form SD.

## Section 2 – Exhibits

### Item 2.01 Exhibits

<u>Exhibit Number</u>	<u>Description</u>
---------------------------	--------------------

<a href="#">1.01</a>	<a href="#">Conflict Minerals Report for the calendar year ended December 31, 2022.</a>
----------------------	---

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Date: May 24, 2023

By: /s/ Kenneth A. Jacobson

Name: Kenneth A. Jacobson

Title: Chief Financial officer

## CONFLICT MINERALS REPORT

For the Reporting Period from January 1 to December 31, 2022

### Introduction

This is the Conflict Minerals Report of Avnet, Inc. for the calendar year 2022 ("Report"), which has been filed as an exhibit to the Company's Form SD as provided for in Rule 13p-1 of the Securities Exchange Act of 1934 (the "Conflict Minerals Rule") and is posted on the Company's website at <https://www.avnet.com/wps/portal/us/about-avnet/human-rights/conflict-minerals>. Information contained on, or accessible through, the Company's website is neither part of nor incorporated by reference into this Report. The date of filing of this Report is May 24, 2023.

References in this Report to "the Company," "Avnet," "we," "our," or "us" means Avnet, Inc. together with its subsidiaries, except where the context otherwise requires.

### Applicability of the Conflict Minerals Rule to Avnet

Avnet is a global technology distributor and solutions provider that supports customers at every stage of the product lifecycle, from idea to design and from prototype to production. Its position at the center of the technology value chain enables it to accelerate the design and supply stages of product development so customers can realize revenue faster. A core part of Avnet's business is as a global distributor of electronic components. It markets, sells and distributes electronic components from the world's leading electronic component manufacturers, including semiconductors, IP&E components (interconnect, passive and electromechanical), and other integrated and embedded components; and distributes a comprehensive portfolio of kits, tools, industrial automation components, and test and measurement products. It also provides embedded solutions, such as technical design, integration and assembly of embedded products, systems, and solutions; provides integrated solutions for embedded display solutions, such as touch and passive displays; and develops and produces standard board, industrial subsystems, and application-specific devices.

The Conflict Minerals Rule requires that the Company disclose in an annual Form SD and associated Conflict Minerals Report information regarding any conflict minerals that are "necessary to the functionality or production" of any product that it manufactures or contracts to be manufactured. The Securities and Exchange Commission ("SEC") defines conflict minerals as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten (collectively, "CMs"). The Democratic Republic of Congo and its adjoining countries have extensive reserves of CMs, some of which are illegally sourced and traded by armed groups who are responsible for significant human rights violations. The purpose of the Conflict Minerals Rule is to encourage companies whose products contain CMs to endeavor to source from suppliers who do not directly or indirectly support such armed groups through their purchasing decisions. The term CM refers to the named minerals and their derivatives, and does not infer that the procurement of such minerals or derivatives directly or indirectly financed or benefitted armed groups in the Democratic Republic of Congo or an adjoining country. CMs are used in many electronic components and computer products.

Avnet's revenues for 2022 were largely from distribution and services that were not in-scope for purposes of compliance with the Conflict Minerals Rule. However, it manufactured or contracted to manufacture certain products in which CMs were necessary to the functionality or production of those products during 2022 (collectively, "Covered Products"). Therefore, the Company conducted a reasonable country of origin inquiry ("RCOI"), in good faith, to determine whether any of the CMs in the Covered Products: (1) originated in the Democratic Republic of Congo or an adjoining country, including Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia (collectively, the "Covered Countries"); or (2) are from recycled or scrap sources. Please see "Conflict Minerals Program – Reasonable Country of Origin Inquiry" for more information on the RCOI.

The Company conducted further due diligence on the source and chain of custody of such CMs that conformed, in all material respects, to an internationally recognized due diligence framework as required by the Conflict Minerals Rule. Please see “Conflict Minerals Program – Design of Conflict Minerals Program” for more information on the design of the due diligence program and “Conflict Minerals Program – Due Diligence Efforts” for more information on the due diligence conducted.

Avnet is a downstream consumer of CMs. It does not purchase the necessary CMs contained in its Covered Products directly from mines, smelters or refiners and is generally many levels removed from such market participants. Through the efforts described in this Report, Avnet seeks to ensure that its sourcing practices are consistent with its Responsible Minerals Sourcing Policy and to encourage conflict free sourcing in its supply chain.

### **Responsible Minerals Sourcing Policy**

Avnet is committed to responsible sourcing of CMs and promotes traceability of CMs and transparency of its global supply chain. It supports the efforts of the Responsible Business Alliance’s (“RBA”) due diligence and reporting processes that seek to ensure supply chain transparency, including through its engagement of Assent, a third-party service provider which is a member of RBA’s Responsible Minerals Initiative (“RMI”). In addition, the Company has actively engaged with its customers and suppliers for several years with respect to the use of CMs, and has adopted a Responsible Minerals Sourcing Policy, which has been communicated to Avnet’s suppliers and the public. The Responsible Minerals Sourcing Policy is below:

Avnet, Inc., including its subsidiaries (collectively “Avnet”), is committed to source minerals responsibly and avoid sourcing minerals that contribute to armed conflict or human rights abuses in conflict affected and high-risk areas (CAHRAs), including the Democratic Republic of Congo (DRC) or adjoining countries. Avnet’s approach is to promote the traceability and transparency of supply chains and move towards a conflict-free global supply chain.

Avnet supports the aims of the Responsible Business Alliance’s Responsible Minerals Initiative (RMI) to identify, reduce and eventually eliminate the use of conflict minerals that finance or benefit conflict or human rights violations, and the Responsible Minerals Assurance Process (RMAP) to validate responsible sources. Avnet encourages its suppliers to likewise support such efforts. “Conflict minerals” include tantalum, tin, tungsten and gold, which are used in many electronic components and computer products.

Under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the U.S. Securities and Exchange Commission (“SEC”) rules, Avnet is required to annually report on Form SD whether products it manufactures or contracts to manufacture contain conflict minerals necessary to the functionality or production of the products, which have been sourced from mines in the DRC or adjoining countries (“covered products”). Revenue from the mining and trade of conflict minerals from the DRC or adjoining countries is believed to finance or benefit armed groups that are responsible for human rights violations.

Avnet is a global technology distributor and solutions provider. To a very limited extent Avnet manufactures or contracts to manufacture products, some of which are covered products. However, Avnet is a downstream consumer of conflict minerals. It does not purchase directly from mines, smelters or refiners and is many levels removed from such market participants. Avnet endeavors to avoid purchasing products containing conflict minerals sourced from CAHRAs that directly or indirectly finance or benefit armed groups, while minimizing unintended consequences of de facto embargoes for conflict-free mines. Avnet also expects its suppliers to source minerals only from responsible sources.

Avnet annually conducts a reasonable country of origin inquiry (RCOI) and due diligence that aligns with the *Organisation for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas* (OECD Framework). As a downstream consumer, Avnet expects its suppliers to provide proper verification of the country of origin and source of the conflict minerals used in the products they supply to Avnet, utilizing the most current Conflict Minerals Reporting Template (CMRT) developed by RMI. Avnet also encourages its suppliers to adopt similar policies, due diligence frameworks, and management systems with respect to responsible minerals sourcing to drive those efforts throughout their supply chain.

The Responsible Minerals Sourcing Policy is available on the Company's website at <https://www.avnet.com/wps/portal/us/about-avnet/human-rights/conflict-minerals>.

## **Conflict Minerals Program**

### **Design of Conflict Minerals Program**

Avnet's 2022 Conflict Minerals Program ("2022 Program") utilized the internationally recognized framework *The Organization for Economic Co-Operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas* and the related supplements for gold, tin, tantalum, and tungsten ("OECD Framework") to develop its process to identify the country of origin and chain of custody of the CMs.

As Avnet does not purchase CMs directly from any mine, refiner or smelter, its supply chain with respect to the CMs in its Covered Products is highly complex and there are many parties in the supply chain between Avnet's direct supplier and the mine from which the CM originated. Due to the Company's "downstream" position in the supply chain, it followed the principles outlined in the OECD Framework for downstream companies with no direct relationships to smelters or refiners. Therefore, Avnet must rely, in good faith, on its direct suppliers to provide it with information regarding the country of origin and chain of custody of the CMs included in the Covered Products and on third-party audit programs. It is likely that years of engagement and propagation of expectations through many tiers of the supply chain will be necessary before information returned to downstream companies, such as Avnet, may be considered accurate and complete.

### **Covered Products**

Avnet determined that the following products it manufactured or contracted to manufacture in 2022 contained CMs necessary to the functionality or production of those products, which are referred to as the Covered Products:

- Electromechanical solutions manufactured or contracted to be manufactured by DEM Manufacturing.
- Test tools for development engineers incorporating wireless charging functionality using the Wireless Power Consortium "Qi" technology contracted to be manufactured for AVID.
- Semi-conductor electronic devices designed and contracted to be manufactured by Avnet per customer specifications.
- Electronic boards, electronic devices, display solutions, and Human-Machine Interface (HMI) solutions manufactured or contracted to be manufactured by Avnet Embedded GmbH.
- Control boards and HMIs contracted to be manufactured.
- Server based products integrated from customer designed and/or off-the-shelf components by Avnet Integrated.
- Design kits and modules manufactured or contracted to be manufactured by Avnet.
- Development boards manufactured or contracted to be manufactured by EBV Elektronik.
- Development boards and accessories contracted to be manufactured by Avnet.
- Printed circuit board assembly (PCBA) designed by customer and contracted to be manufactured by Farnell.
- PCBA and high-level integration of customer products.
- Avnet Guardian products manufactured or contracted to be manufactured by Avnet.
- Cables and electromechanical assembled products manufactured or contracted to be manufactured by Avnet.

Covered Products do not include products that were not entered into the stream of commerce in 2022, and do not include products manufactured or contracted to be manufactured by entities acquired by Avnet after April 2022, as provided by the Conflict Minerals Rule.

### **Reasonable Country of Origin Inquiry**

Pursuant to the Conflict Minerals Rule, Avnet conducted a RCOI on the source and chain of custody of the CMs in its Covered Products, to determine whether any of the necessary CMs in its Covered Products originated in any of the Covered Countries and may not have come from recycled or scrap sources. To the extent applicable, Avnet conducted its RCOI utilizing the same processes and procedures that it established for conducting its due diligence, in particular Steps 1 and 2 of the OECD Framework, which are described under "Due Diligence Efforts" below.

The 2022 RCOI included 429 suppliers (“Suppliers”) that Avnet identified as possibly providing it with components, parts or products that contained the necessary CMs for its Covered Products. These Suppliers identified smelters and refiners that may have processed the necessary CMs contained in the Covered Products. Such smelters and refiners were compared against the Smelter Look-up tab of the Conflict Minerals Reporting Template (“CMRT”) and the list of “conformant” smelters and refiners and country of origin information published by the RBA’s Responsible Minerals Initiative (“RMI”) to validate the smelters and refiners, which validated facilities are listed in [Appendix A](#), and to determine the countries from where such validated facilities may have obtained CMs, which countries are listed in [Appendix B](#). For this process, Avnet utilized the data its Suppliers provided on their CMRTs version 6.2 or higher along with RMI’s due diligence of smelters and refiners and audits under the Responsible Minerals Assurance Process (“RMAP”) standard. The RMAP uses an independent third-party audit of smelter and refiner management systems and sourcing practices to validate conformance with RMAP protocols and current global standards.

The Company retained Assent (formerly known as Assent Compliance, “Assent”), a third-party service provider, to assist in the collection and review of Supplier CMRTs and the identification of risks in the supply chain. During the 2022 RCOI, Avnet contacted Suppliers via the Assent Compliance Manager (“ACM”), a software-as-a-service platform that enables users to manage and track supplier communications and allows suppliers to upload completed CMRTs directly to the platform for validation, assessment and management. ACM provides functionality that meets the OECD Framework process expectations by evaluating the quality of each Supplier’s response and assigning a health score based on the Supplier’s declaration of process engagement. Additionally, the results provided in this Report, as well as the step-by-step process for Supplier engagement and upstream due diligence investigations performed, are managed through ACM.

Avnet requested that all Suppliers complete a CMRT. On behalf of Avnet, Assent offered training and educational resources to Suppliers to guide them on best practices, completion of a CMRT and the use of the ACM platform. Avnet monitored and tracked all communications in ACM for future reporting and transparency. If a Supplier remained unresponsive after three requests through ACM, Avnet may directly follow-up with such Supplier.

Supplier CMRTs are subjected to an automated data validation process, with the goal to increase the completeness and accuracy of submissions and identify any contradictory answers in a CMRT. This data validation process is based on questions within the declaration tab of the CMRT, which helps to identify areas that require further classification or risk assessment as well as to understand the due diligence efforts of the Suppliers. Data validation contributes to the health assessment of Avnet’s Conflict Minerals Program, and the results are shared with Suppliers regarding areas that require clarification or improvement.

Submitted Supplier CMRTs are accepted and classified as either valid or invalid. If a Supplier’s CMRT is classified as invalid, the Supplier is provided feedback and guidance on how to correct the validation errors and requested to re-submit a valid CMRT. In addition, Suppliers are provided training courses and direct engagement help through Assent’s multilingual Supplier Experience team.

### **Due Diligence Efforts**

Based on the findings of the 2022 RCOI, pursuant to the Conflict Minerals Rule, Avnet conducted further due diligence on the source and chain of custody of the CMs in its Covered Products. The Company designed its due diligence measures to conform, in all material respects, with the OECD Framework, which contains a five-step structure for due diligence as a basis for responsible global supply chain management of CMs from conflict-affected and high-risk areas.

#### **1. Establish strong company management systems**

- Avnet has a governance team and a working team to carry out its Conflict Minerals Program. The governance team is made up of senior management and is responsible for ensuring that the program meets regulatory requirements and enterprise goals and provides direction to the working team. The working team is responsible for the day-to-day implementation of the program, diligence efforts and risk mitigation strategy and informs the governance team about the results of the due diligence and risk mitigation efforts.

- Avnet uses a third-party service provider, Assent, to assist with collecting and evaluating supply chain information, identifying potential risks and developing additional due diligence steps. Please see “Conflict Minerals Program – Reasonable Country of Origin Inquiry” for more information on the use of Assent and its software platform ACM. Avnet also leverages Assent’s managed services to work with dedicated program specialists who support Avnet’s CM program and provide Avnet updates on program status.
- Avnet has a Responsible Minerals Sourcing Policy, as discussed earlier in this Report. Pursuant to this policy, Avnet expects its Suppliers to source CMs only from responsible sources and to provide proper verification of the country of origin and source of the materials used in the products they supply to Avnet. Suppliers either receive a copy of the policy or are notified of this policy. In addition, the policy is posted on Avnet’s website. This policy is reviewed annually by the governance team.
- Avnet’s Global Supplier Quality Handbook further discloses its expectations for suppliers, including an expectation that suppliers only source materials from environmentally and socially responsible suppliers.
- Avnet seeks to include CM related provisions in new or amended supplier agreements with respect to the Covered Products. Its current form of supplier agreement contains a CM provision that requires a Supplier to warrant that any products it supplies containing CMs either does not finance or benefit armed groups in the Covered Countries or are from recycled or scrap sources.
- Avnet uses the current CMRT version developed by RMI to identify smelters and refiners in its supply chain. The CMRT requires Suppliers to provide information concerning the usage and source of CMs in their components, parts and products, as well as information concerning their related compliance efforts, including whether they have a policy on conflict-free sourcing and require their own suppliers to source CMs from responsible sources.
- By using Assent, Avnet provides its Suppliers access to a free platform to upload their CMRTs, help desk support, educational resources on how to properly complete and submit a CMRT, and other multilingual resources.
- Employees, vendors, suppliers, customers and any third-party can confidentially report concerns regarding Avnet’s business operations, including compliance with the Responsible Minerals Sourcing Policy, through the Ethics Alertline, via phone or internet. Violations or grievances at the industry level can be reported to the RMI directly at <http://responsiblemineralsinitiative.org/responsible-minerals-assurance-process/grievance-mechanism/>.
- Avnet has a document retention policy to retain CM related documents, including supplier responses to CMRTs and the sources identified within each reporting period, for at least five years.

## **2. Identify and assess risk in the supply chain**

- Avnet identifies the business segments that manufacture or contract to manufacture products reasonably believed to contain CMs and determine the Covered Products subject to the Conflict Minerals Rule. As a global value-added distributor, a significant percentage of Avnet’s operations are out of scope of the Conflict Minerals Rule.
- Avnet identifies the active suppliers of materials, components, parts, and products that may contain CMs for the Covered Products, and each Supplier is requested to complete the then latest revision of the CMRT. Avnet expects its direct Suppliers to survey their suppliers.

- Supplier level risks include non-responsive Suppliers. Avnet tracks receipt of Supplier CMRTs, and if a Supplier remains unresponsive after three requests through the ACM platform, Avnet may directly follow-up with such Supplier. Follow-up with non-responsive Suppliers continued into 2023.
- Supplier level risks include incomplete or invalid submitted CMRTs. Submitted CMRTs go through a data validation process to evaluate responses for plausibility, completion, and consistency to lower the risks associated with Supplier CMRT content. To the extent that a CMRT is incomplete, invalid, or other relevant information is not provided by a Supplier, follow-up procedures are undertaken to request compliance and to offer feedback, guidance and educational resources. Follow-up with such Suppliers continued into 2023.
- Supplier level risks include weak or undeveloped Supplier CM programs. Based on a Supplier’s submitted CMRT, the strength of a Supplier’s related compliance efforts, including whether it has a conflict minerals sourcing policy or implements due diligence measures for conflict free sourcing, is evaluated, tracked and rated as either weak or strong.
- Supplier level risks include Supplier CMRTs that are based on company-level information versus Covered Product-level information. Suppliers may have been over-inclusive if their suppliers provide information on a company-level basis and under-inclusive if Suppliers experience non-responsive suppliers or incomplete supplier CMRTs. Therefore, the Company is unable to determine if the smelters and refiners listed in [Appendix A](#) were all utilized or is a complete list of smelters and refiners utilized for CMs in the Covered Products.
- Supplier level risks include suppliers with problematic smelters and refiners in its supply chain. The CMRT data validation process evaluates responses for predetermined red flag indicators defined in the OECD Framework to identify risks in the supply chain posed by smelters and refiners.
  - Smelters and refiners identified in the CMRTs are compared against the Smelter Look-up tab of the CMRT and the list of Conformant smelters and refiners and country of origin information published by the RMI to determine if the smelter had been audited against a standard in conformance with the OECD Framework, such as RMAP.
  - If a smelter’s due diligence practices have not been audited against the RMAP standard or the smelter is considered non-conformant by RMAP, follow-ups may be conducted with Suppliers reporting those facilities and the facilities are assessed for potential sourcing risks.
  - The process uses multiple factors to determine the level of risk that each smelter and refiner poses to the supply chain. Factors include: RMAP audit status, geographic proximity to Conflict-Affected and High Risk Areas, known mineral source country of origin, credible evidence of unethical or conflict sourcing, peer assessments conducted by credible third-party sources, and sanction risks.

### **3. Design and implementation of a strategy to respond to identified risks**

- Avnet has a risk management plan through which the Conflict Minerals Program is implemented, managed, and monitored. The plan includes processes to assess and respond to the risks identified in the supply chain, which are described in more detail under “Due Diligence Efforts – 2. Identify and assess risk in the supply chain.” Feedback on Supplier CMRTs is given directly to Suppliers and educational resources are provided to assist Suppliers in corrective action methods or to improve their internal programs.
- Avnet works with Suppliers on an as-needed basis to assist them with understanding the requirements of the Conflict Minerals Rule. Avnet also offers, through Assent, training and educational resources to Suppliers to guide them on best practices, completion of a CMRT and the use of the ACM platform.
- Avnet participates in Assent’s smelter outreach initiative, where letters are sent twice a year to each smelter and refiner not conformant or not enrolled in RMAP to encourage participation in a cross-recognized industry audit program. The initiative also includes letters to smelters and refiners who are conformant to RMAP to reflect appreciation for their efforts.

- Working team leaders monitor risks and share the CM Program results, risk assessments, and draft Form SD filings with the governance team to ensure transparency within Avnet.
- Avnet's Responsible Minerals Sourcing Policy publicly announces its expectations that Suppliers participate in Avnet's due diligence process by providing proper verification of the country of origin and source of the materials used in the Covered Products they supply to Avnet. The policy and the Global Supplier Quality Handbook also state that Suppliers are expected to source CMs only from responsible sources.
- Avnet seeks to include CM related provisions in new or amended supplier agreements with respect to the Covered Products and include CM related due diligence in acquisition activities.
- Avnet has processes in place for new product introductions and changes to the bill of materials for the Covered Products to help ensure compliance with the Conflict Minerals Program.
- Employees, vendors, suppliers, customers and any third-party can confidentially report concerns regarding Avnet's business operations, including compliance with the Responsible Minerals Sourcing Policy, through the Ethics Alertline, via phone or internet.

#### **4. Carry out independent third-party audit of supply chain due diligence**

- As Avnet is a downstream consumer of CMs and is generally many steps removed from smelters and refiners which provide minerals and ores, Avnet is not positioned to conduct direct audits of smelters and refiners' due diligence practices. Instead, it relies on initiatives such as those led by RBA, including RMI, to conduct smelter and refinery due diligence audits.

#### **5. Report annually on supply chain due diligence**

- Avnet annually files a Form SD and a Conflict Minerals Report with the SEC and makes them available to the public on its website at <https://www.avnet.com/wps/portal/us/about-avnet/human-rights/conflict-minerals>.

### **Results of 2022 Conflict Minerals Program**

As a downstream purchaser of components, parts and products that may contain CMs, Avnet's 2022 Program can provide only reasonable, but not absolute, assurance regarding the country of origin and chain of custody of the necessary CMs in its Covered Products.

The due diligence process is based on Avnet requesting information from its direct Suppliers, with those Suppliers requesting similar information from their suppliers and so on, up the supply chain, to eventually identify the original sources of the necessary CMs. However, those who purchase CMs directly from smelters or refiners may not be able to discern which of its product lines include specific CMs from each smelter or refiner, and so it is common practice for such purchasers to list all smelters and refiners they may purchase from within the reporting period. Likewise, Suppliers' CMRTs primarily provided information at the company level, with few at the product level, and Suppliers may have received similar information from their suppliers and so on. Therefore, Avnet must rely, in good faith, on its direct Suppliers to provide it with valid and complete information. Finally, not all Suppliers completed CMRTs or completed CMRTs in full for the 2022 Program.

For the 2022 Program, 429 Suppliers were identified, of which 297 (or 69.2%) submitted a completed CMRT, an increase from the 2021 program.

**Supplier CMRT Results**

<b>Year of Program</b>	<b># Suppliers in Scope</b>	<b># Completed CMRTs</b>	<b>% Completed CMRTs</b>	<b># Valid CMRTs</b>	<b>% Valid CMRTs</b>
2022	429	297	69.2%	290	67.6%
2021	454	263	57.9%	251	55.3%

**Strength of Supplier CM Program Results**

<b>Year of Program</b>	<b># Completed CMRTS</b>	<b># Suppliers with CM programs and policies rated as strong</b>	<b># Suppliers with no CMs in their products</b>	<b>Total Suppliers with strong CM programs/policies or no CMs in products</b>	<b>% of such Suppliers</b>
2022	297	228	37	265	89.2%
2021	263	193	39	232	88.2%

The 343 legitimate smelters and refiners identified by Suppliers in completed CMRTs, which appear on the RMI-maintained smelters list, are listed in [Appendix A](#). Based on the limitations explained above, this list may be incomplete or more comprehensive than the list of smelters and refiners which actually processed the CMs contained in the Covered Products. The below table summarizes the number of such legitimate smelters and refiners which have been audited, are in the process of being audited, or not enrolled to be audited by RMI utilizing the RMAP standard as well as audit results.

**Smelter and Refiner Audit Status Results (1)**

<b>RMI Audit Status</b>	<b>Legitimate Smelters and Refiners</b>	
RMAP Conformant (2)	223	65.0%
RMAP Active (3)	8	2.3%
Non-Conformant (4)	24	7.0%
Not Enrolled (roll up of the statuses below)	88	25.7%
<b>Total</b>	<b>343</b>	<b>100.00%</b>

<b>Not Enrolled subcategories</b>	<b>Count</b>
Communication Suspended - Not Interested(5)	6
Due Diligence Vetting Process (6)	0
In Communication (7)	14
Outreach Required (8)	46
RMI Due Diligence Review - Unable to Proceed (9)	22

(1) The compliance status information provided in the table is based solely on information made available by RMI, without independent verification by the Company.

(2) “Conformant” means that the smelter or refiner has completed the independent annual audit process and been found to be in conformance with the relevant RMAP standard, whereby verified to have conflict-free sources.

(3) “Active” means that the smelter or refiner is in the process of being independently audited or has committed to begin the audit process but has not yet been determined to be in conformance with the relevant RMAP standard.

(4) “Non-Conformant” means that the smelter or refiner has been independently assessed but found not to be in conformance with the relevant RMAP standard.

(5) “Communication Suspended – Not Interested” means the smelter or refiner has strongly communicated a lack of interest in participating in the audit program.

(6) “Due Diligence Vetting Process” means the smelter or refiner does not meet RMI’s requirements for participation in the audit program according to the Due Diligence Vetting Process.

(7) “In Communication” means the smelter or refiner is not yet active but is in communications with RMAP and/or a member company.

(8) “Outreach Required” means RMI member companies need to contact entity to encourage their participation in audit program.

(9) “RMI Due Diligence Review – Unable to Proceed” means the smelter or refiner has not met the thresholds for the Due Diligence Vetting Process after a period of 6 months. Status may change if additional information is submitted.

The aggregated list of countries of origin from which the reported smelters and refiners may have collectively sourced CMs, based on information provided through the CMRT data collection process and RMAP audits, is provided in [Appendix B](#). Based on the limitations explained above, this list may be incomplete or more comprehensive than the list of countries from which CMs contained in the Covered Products were actually sourced.

After conducting its 2022 Program, and in light of the limitations explained above, Avnet concludes that it is unable to determine the origin of the CMs contained in its Covered Products and unable to determine whether its Covered Products are DRC conflict free.

### **Steps to be taken in Calendar 2023**

As Avnet endeavors not to purchase products that contain CMs that directly or indirectly finance or benefit armed groups in the Covered Countries, and in order to mitigate the risk of purchasing such products, it has continued with its Conflict Minerals Program discussed above during calendar year 2023 and specifically plans to pursue the following steps and improvements:

- Continue to engage with Suppliers that provided incomplete responses or no responses for 2022 to help encourage them to provide requested information for 2023.
- For Suppliers whose conflict minerals compliance programs and policies are deemed weak, continue to follow-up with such Suppliers to encourage them to improve their efforts and policies.
- For new in-scope suppliers, to: (i) communicate Avnet’s sourcing expectations, including through the dissemination of the Responsible Minerals Sourcing Policy and Global Supplier Quality Handbook and inclusion of CM sourcing requirements in supplier agreements; and (ii) provide access to training and educational resources on the requirements of the Conflict Minerals Rule and to guide them on best practices, completion of a CMRT and the use of the ACM platform.
- Proactively analyze whether any CMs are present in future products that it develops or in existing products to the extent the materials included in such existing products are revised.
- Proactively seek to include CM related provisions in new or amended supplier agreements with respect to the Covered Products.

- Continue to monitor its Ethics Alertline for issues related to the Company's conflict minerals program.

### **Cautionary Statement about Forward-Looking Statements**

Certain statements in this Report may be "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Words such as "expects," "intends," "plans," "believes," "anticipates" and similar expressions, or the use of future tense, are used to identify these forward-looking statements. Examples of forward-looking statements include statements relating to the Company's future plans, additional steps it intends to take to mitigate the risk that the Company's necessary CMs benefit armed groups and other statements that do not relate to historical or current facts.

Forward-looking statements are based on the Company's current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict, including: (1) the continued implementation of satisfactory traceability and other compliance measures by Avnet's direct and indirect suppliers on a timely basis or at all, (2) whether smelters, refiners, and other market participants responsibly source CMs and (3) political and regulatory developments regarding CMs. Actual outcomes and results may differ materially from these forward-looking statements. As a result, these statements speak only as of the date they are made and the Company undertakes no obligation to update or revise any forward-looking statement, except as required by federal securities law.

## APPENDIX A

### **List of Smelters and Refiners**

Avnet utilized data its Suppliers provided on their CMRTs for the 2022 Program along with RBA's RMI due diligence of smelters and refiners to prepare the below list. The list: (1) may not include all of the smelters and refiners that processed CMs in the Covered Products and (2) may include smelters and refiners which processed CMs which were not contained in the products provided by the Suppliers for the Covered Products.

For RMI Audit Status:

- (1) "Conformant" means that the smelter or refiner has completed the independent annual audit process and been found to be in conformance with the relevant RMAP standard, whereby verified to have conflict-free sources.
- (2) "Active" means that the smelter or refiner is in the process of being independently audited or has committed to begin the audit process but has not yet been determined to be in conformance with the relevant RMAP standard.
- (3) "Non-Conformant" means that the smelter or refiner has been independently assessed but found not to be in conformance with the relevant RMAP standard.
- (4) "Communication Suspended – Not Interested" means the smelter or refiner has strongly communicated a lack of interest in participating in the audit program.
- (5) "Due Diligence Vetting Process" means the smelter or refiner does not meet RMI's requirements for participation in the audit program according to the Due Diligence Vetting Process.
- (6) "In Communication" means the smelter or refiner is not yet active but is in communications with RMAP and/or a member company.
- (7) "Outreach Required" means RMI member companies need to contact entity to encourage their participation in audit program.
- (8) "RMI Due Diligence Review – Unable to Proceed" means the smelter or refiner has not met the thresholds for the Due Diligence Vetting Process after a period of 6 months. Status may change if additional information is submitted.

## APPENDIX B

### Countries of Origin

Avnet utilized data its Suppliers provided on their CMRTs for the 2022 Program and relied on information provided by RBA's RMI due diligence of smelters and refiners regarding the countries of origin and mines or locations of origin to prepare the below list. The list: (1) may not include all of the countries which ultimately sourced the CMs in the Covered Products and (2) may include countries which did not ultimately source CMs contained in the Covered Products.

Country of Origin (Material)			
Afghanistan	Czechia	Kenya	Rwanda
Åland Islands	Democratic Republic of Congo	Korea	Samoa
Albania	Djibouti	Kyrgyzstan	Saudi Arabia
American Samoa	Dominica	Liberia	Senegal
Andorra	Dominican Republic	Liechtenstein	Sierra Leone
Angola	Ecuador	Lithuania	Singapore
Argentina	Egypt	Luxembourg	Slovakia
Armenia	Eritrea	Madagascar	Slovenia
Aruba	Estonia	Malaysia	South Africa
Australia	Ethiopia	Mali	South Sudan
Austria	Finland	Mauritania	Spain
Azerbaijan	France	Mexico	Sudan
Bahamas	Georgia	Mongolia	Suriname
Barbados	Germany	Morocco	Sweden
Belarus	Ghana	Mozambique	Switzerland
Belgium	Guam	Myanmar	Taiwan
Benin	Guatemala	Namibia	Tajikistan
Bermuda	Guinea	Netherlands	Tanzania
Bolivia (Plurinational State of)	Guyana	New Zealand	Thailand
Brazil	Honduras	Nicaragua	Turkey
Bulgaria	Hong Kong	Niger	Uganda
Burkina Faso	Hungary	Nigeria	United Arab Emirates
Burundi	India	Norway	United Kingdom
Cambodia	Indonesia	Panama	United States
Canada	Ireland	Papua New Guinea	Uzbekistan
Central African Republic	Israel	Peru	Viet Nam
Chile	Italy	Philippines	Zambia
China	Japan	Poland	Zimbabwe
Colombia	Jersey	Portugal	
Congo	Kazakhstan	Russian Federation
